What you should know about Hepatitis A

A highly contagious liver disease caused by a virus spread from person to person. The illness can last for weeks to months.

How is it spread?

forgetting to wash your hands after using the bathroom or changing diapers

sharing sexual contact with a hepatitis A carrier

eating or drinking foods contaminated by hepatitis A

What are the symptoms?

Tiredness or feeling like you're sick

Fever

Yellowing of the eyes or skin

- Other symptoms include:
- Dark urine
 - Dark stool
 - Loss of appetite
 - Nausea or pain

How can you prevent it?

Get vaccinated. Call 211 for information on when to get a shot.

Wash hands with soap and water before eating, preparing food, and after using the bathroom, changing diapers.
