

New Process for Street Sweeping Enforcement

In an effort to improve our service to the public, the City has changed its protocol for street sweeping enforcement.

Beginning Wednesday, February 12, 2020 Parking Control Officers will no longer drive in front of the street sweeper when the sweeper is travelling on its route. Officers will now trail behind the street sweeper and follow it as it moves through neighborhoods.

When an Officer observes a vehicle parked on the street and the sweeper is unable to sweep the curb properly as a result, the Parking Officer will take a photo of the sweeper going around the parked car and issue a citation. The street sweeper will stop and wait for the Officer to complete the citation, before resuming forward.

Once the sweeper has completed sweeping the street, residents will then be able to park their vehicles back on the street without being cited for parking inside of the posted time limits.

This information is intended to make parking restrictions on street sweeping days much clearer, and potentially reduce the number of parking citations and appeals. Also, residents will no longer have to wait until the end of the posted time to park their vehicle back on the street.

Anyone with questions about this change is encouraged to contact the Municipal Services Department at (310) 973-3220.
