CONSTRUCTION/DEMOLITION FENCE REQUIREMENT

Lawndale Municipal Code Section 17.36.200 (see below) requires a 6”(six-foot) high fence around construction/demolition sites. Prior to the issuance of building/demolition permits, you must certify in writing, that the required fencing will be installed.

I hereby certify that a Construction fence will be installed at _____,
Located in the City of Lawndale in accordance with Section 17.36.200, Lawndale Zoning Ordinance.

Applicant’s Signature

Date

17.36.200 Fencing required.

A minimum six-foot high chain link fence shall be installed around a construction site prior to demolition or construction on the site and shall remain in place continuously until completion of construction, unless otherwise approved by the director of planning and building. No building permits shall be issued unless said fence is already installed and verified by the planning and building department. Two gated entrances six feet in height shall be permitted along the perimeter for grading and construction vehicles. If at any time after issuance of the building permit inspection reveals that damage to fence creates a safety hazard, the city reserves the right to immediately barricade and/or repair such damage. Cost for such repair shall be assessed against the owner of the property. No such lots may be assessed unless the city complies with the procedures provided in chapter 99 of the Los Angeles County Building Code. (Ord. 532-86 § 3-1-A-12)
